PROFESSIONAL EXPERIENCE

CONSERVICE, LLC   June 2014-Current

Billing Software Developer

-Design and create and release software using C#, SQL, .NET, React, and Javascript for internal use within the company. Automate and streamline client workload and remove the human element so that the company may expand at a faster rate.

Training Project Specialist

-Build time saving resources through the use of HTML, CSS, Bootstrap, and Google script to allow for team leaders and trainers to spend more time training and less time tracking employee and trainee statistics.

Utility Processing Trainer

-Create strong employees by providing a strong learning environment. Develop and modify training programs to help reduce training time and increase the number of productive and successful employees. Manage a team of new hires and individualize training programs to maintain quality employees and ensure the success of the individual.
